The theory treats on equal footing the humorous effect created by the linguistic means (verbal humor), as well as created visually (caricature, clown performance) or by tickling. The theory explains the natural differences in susceptibility of people to humor, the absence of humorous effect from a trite joke, the role of intonation in telling jokes, nervous laughter, etc.

~~Theories of humor - Wikipedia~~

As is widely known, theories of humour are traditionally divided in three branches: (1) Theories of incongruity, or inconsistency, or contradiction, or bisociation. In- congruity theories are essentially cognitive, i.e. they are based on some objective characteristics of a humorous text or other act (situation, event, picture, etc.).

~~Aspects Of Verbal Humour In English Free~~

Verbal humour is understood as that produced by means of language or text (Raskin, 1986), which includes jokes, witticisms, puns, and so on. Jokes, or humour are something that make people laugh. Also, it is a basic means of social interaction such as building social connections or dealing with unfamiliar situations.
