Introduction To Information And Communication

Information and Communications Technology forms part of the core curriculum for all Leaving Certificate Applied students. It is intended to give students the skills and understanding to use computers in both their current and future lives. The Leaving Certificate Applied programme offers the ideal forum for students to apply these skills in a practical way, particularly in presenting task work and key assignments across the full spectrum of the curriculum.

Introduction to Information and Communications Technology

This chapter provides an introduction to the information theory and communication theory. It provides an understanding of the information measures and the bounds given by them, e.g., bounds on source coding and channel coding. The chapter also describes source coding and channel coding on the basis of some well‐known algorithms.

Introduction - Information and Communication Theory ...

Information is knowledge and helps us to fulfill our daily tasks. For example, forecasting the stock exchange market. COMMUNICATION Communication is an act of transmitting messages. It is a process whereby information is exchanged between individuals using symbols, signs or verbal interactions. Previously, people communicated through sign or symbols,
