Vitreoretinal surgery is a new and evolving branch of eye surgery that involves microsurgical techniques. Surgery is performed inside the eye, allowing damage caused by an accident to be repaired, or a detached retina to be reattached. This type of surgery requires a great deal of skill and often takes place on urgent or emergency cases.

What is vitreoretinal surgery? | Private Healthcare UK

Vitreoretinal eye surgery includes a group of procedures performed deep inside the eye's interior with lasers or conventional surgical instruments. As the name implies, this delicate surgery takes place where the gel-like vitreous. vitreous body.
