ROMEX\u0026amp; 14-3 cable refers to a type of electrical wiring cable used inside a home in dry areas, such as attics and inside walls. This cable contains four conductors: a black (hot) wire, a red (hot) wire, a white common wire and a ground wire. All four conductors are wrapped in a plastic sheath. ROMEX\u0026amp; 14-3 is designed for use on circuits that require 220 to 240 volts from the power panel.

Feed a length of 14-3 type NM cable (or 12-3, if you're connecting to 12-gauge wire) between the two boxes. The 14-3 cable has three insulated conductors: white, black and red (plus a bare ground wire). Connect the wires to the new 3-way switches with ground screws using one of the two wiring diagrams (Fig. A or B).

In mathematics and mathematical logic, Boolean algebra is the branch of algebra in which the values of the variables are the truth values true and false, usually denoted 1 and 0, respectively. Instead of elementary algebra, where the values of the variables are numbers and the prime operations are addition and multiplication, the main operations of Boolean algebra are the conjunction (and ...
