The battery-charged  
2003 Club Car operated  
on 48 volts and 17 amps  
of electric power. This  
model featured 3.1 or  
3.2 maximum  
horsepower at 2,400  
rpm. The gasoline-  
powered model included  
a factory installed  
Kawasaki four-cycle,

2003 Club Car DS Gas - Belt Squeal. Have a 2003 Club Car DS with Kawasaki gas engine and am brand new to owning a golf cart. Really enjoying it but think it needs a drive belt and/or alternator belt. One of them squeals under harder acceleration or heavier loads (e.g. 4 people in cart going up a hill).

## 2003 Club Car DS Gas - Belt Squeal

Club Car has installed a 286 cc, single-cylinder, overhead valve, pressure-lubricated and air-cooled engine on its gas-model DS Player. The horsepower for the gas model is 9.5 at 3,600 rotations per minute. Club Car notes, in its specifications, that the

# Bookmark File PDF 2003 Club

horsepower range for the gas model is above the standards of SAE J1940 performance requirements.

Worth | Golf Cart

Resource

The performance of the Club Car DS is basic. It utilizes a DC drive

# Bookmark File PDF 2003 Club

system which has been around forever. It is a 250 AMP controller which is good for basic golf course use, however if you are looking for faster acceleration, the ability to carry four people, or drive up and down a lot of hills, then look elsewhere or consider the gas version at least.

## Club Car DS Golf Cart Review | Golf Cart Resource

I recently picked up a 2003 gas Club Car DS that is having a starting issue. At first it was an intermittent spark problem...it would run fine sometimes and on the same trip, it wouldn't run at all. When I pulled the plug out, I had no spark.

# Bookmark File PDF 2003 Club

Now, I get no spark at  
all.
