USR IOT 's industrial Ethernet solutions facilitate the convergence of a variety of Logistics location, Parking information, and Monitoring videodata in real time by providing high-speed throughputs and a wide range of network interfaces, including Ethernet, WLAN, serial, and various different technologies. Smart Energy. With the deployment and implementation of the new energy strategy ...

IoT Devices Manufacturer | Industrial Networking Solutions USR IOT's cellular modems are available in 2G, 3G, 4G LTE cat4 network, the cellular modems are compact and intelligent. USR IOT's cellular modems are disigned for industrial solutions which are suit perfectly to M2M / IoT applications in harsh environment. USR IOT's cellular modems provide a stable and reliable

While the coverage is good, for many IoT devices, 4G is not the best option because of higher module cost, high power consumption and often, there simply is no need for high-speed data connections. 2G and 3G networks, on the other hand, are subject to being shut down in the coming years, meaning that IoT devices using such network modems might end up disconnected.
