Evaluating the ADAS1000 ECG Front End for Demonstration and Development.

~~Evaluating the ADAS1000 ECG Front End for Demonstration ...~~

The evaluation kit consists of an evaluation board kitted with two ADAS1000 devices capable of demonstrating ECG capture up to 12 leads. This board is ideal for exploring concepts and adopting the ADAS1000 into advanced medical systems. The board can be operated as part of an end user's system via the

56-lead LFCSP package (9 mm × 9 mm) 64-lead LQFP package (10 mm × 10 mm body size) Product Details. The ADAS1000 measures electro cardiac (ECG) signals, thoracic impedance, pacing artifacts, and lead-on/lead-off status and output this information in the form of a data frame supplying either lead/vector or electrode data at programmable data rates. Its low power and small size make it suitable for portable, battery-powered applications.

~~ADAS1000 ECG Front-End Evaluation Board for Demonstration ...~~

The primary function of the EVAL-ADAS1000 evaluation board is to demonstrate the ADAS1000 integrated ECG device for medical instrumentation. This evaluation board is used to evaluation the ADAS1000 and all variants. The evaluation board is ideal for exploring concepts and adopting the ADAS1000 into advanced medical systems.

~~Evaluation Board for ADAS1000 ECG Analog Front-End ...~~

The EVAL-ADAS1000SDZ is an evaluation kit to demonstrate the ADAS1000 integrated ECG device for medical instrumentation. The ADAS1000 measures electro cardiac (ECG) signals, thoracic impedance, pacing artifacts, lead on/off status and outputs this information in the form of a data frame supplying either lead/vector or electrode data at programmable data rates. The evaluation kit consists of an ...

~~EVAL-ADAS1000SDZ - Evaluation Kit, ADAS1000 ECG Front-End ...~~

This evaluation board is used to evaluate the ADAS1000 and all variants. The evaluation board is ideal for exploring concepts and adopting the ADAS1000 into advanced medical systems. The board can be operated as part of an end user system via the ADAS1000 serial peripheral interface (SPI), or as a standalone evaluation of the ADAS1000 using the support of the system demonstration platform controller board (SDP-B) and a standard PC (running Windows Vista, Windows 7 32-bit and 64-bit, or ...
