~~Engineering Singular Value Decomposition (SVD): Matrix Approximation~~ *Advanced Well Completion Engineering*

The basis of well completion engineering is composed of the parts in reservoir geology, reservoir engineering, and petroleum production engineering that are related to well completion. The parts in reservoir geology and reservoir engineering include types, configuration, lithology, fluid properties, pore configuration, and fluid flow characteristics of oil and gas reservoirs, which are the theoretical grounds for selecting well completion mode and avoiding formation damage, while the part in ...

Advanced Well Completion Engineering, 3rd Edition. Wan Renpu. Once a natural gas or oil well is drilled, and it has been verified that commercially viable, it must be "completed" to allow for the flow of petroleum or natural gas out of the formation and up to the surface. This process includes: casing, pressure and temperature evaluation, and the proper instillation of equipment to ensure an efficient flow out of the well.

The book *Advanced Well Completion Engineering* has been used not only for solving theoretical problems, but also as a guide to oil and gas well completion, an important basis for formulation of a well completion program, and a textbook in petroleum institutes and universities. Practice has proven that this book conforms to objective practice and has scientific rationality, practicality, and operability.
