In a two-level
multilevel model
(the only type of
model we discuss),
measurements can
occur at Level 1 or
at Level 2. A

Level-1
measurement is an

Methodology

Online Library

Advances In

attribute of a person nested in a particular cluster. For example, in a study that involves 10 classrooms of students, any measurement taken on each of the students, such as performance on a test or the child's sex, would be a Level-1 variable.
