The Turnigy Aerostar Flight Control System has independent gyro gain control for aileron, elevator and rudder. This gyro stabilizer will smooth out these 3 controls and make your model easier and much smoother to fly, especially in rough air conditions. This unit would be perfect in a Trainer type model for beginners to RC flying or for making any model more stable and easier to fly. Features ...

Revised August 1979 Over the years, we've had more requests for aircraft flight manuals than any other product. We're happy to continue offering Aircraft Information Manuals, similar to the type sold by the airplane manufacturers. They include the same data and limitations contained in the original aircraft Pilot's Operating Handbook.
