The Keysight 34901A module for the 34970A/34972A Data Acquisition/Switch Unit is the most versatile multiplexer for general purpose scanning. It combines dense, multi-function switching with 60 channel/second scan rates to address a broad spectrum of data acquisition applications. Two- and four-wire channels can be mixed on the same module.

Hello, we want to use our Agilent 34970A/34901A to log the temperatures of a electronic box during a test. Our customer has embedded some thermistances in the device, but these are 15ohm @25 °C with a beta=3695K. We have checked in the user manual and it states that the Agilent 34970A/34901A will only operate with 2.2k, 5k and 10k thermistors.
