Advance care planning (ACP) is fundamental for everyone living with dementia. It enhances choice, aids delivery of person-centred end of life care, helps to guide care when mental capacity is lost and provides support for families and carers.

## NHS England » Dementia

This phenomenon is called anosognosia (a lack of knowledge or insight), and it can be a serious challenge to deal with as a caregiver for someone with Alzheimer ' s or other types of dementia. Family members and caregivers must keep in mind that their afflicted loved ones are neurologically incapable of acknowledging their mental deficit and underlying illness, regardless of logical explanations or evidence.

## Anosognosia and Caregiving: Suffering from a Lack of Insight

The purpose of the Coronavirus and Dementia in Care Homes Study is to gain an insight into the experience of Covid 19 in care homes from the viewpoint of the staff who work in them. We are particularly interested in finding out the things staff do to help themselves and each other, known as self-help and mutual support strategies.
