The Applied Sciences section of Dentistry will welcome original articles well designed and robustly carried out, and systematic reviews aimed at providing strong and reliable clarifications to clinical and preclinical issues.

~~Applied Dentistry — A section of Applied Sciences~~

Dental implants can brighten and improve a person's smile. Prosthetic dentistry also involves the use of implants. They are false teeth that are meant to stay in a person's mouth instead of being removed like dentures. To create an implant, dentists usually place a titanium screw into the bone of a person's jaw and allow it to fuse in place. A top is later placed over the screw and covered with a crown.
