## Area Of Shaded

Simply put, the area of a shaded region can be calculated using: Area of shaded region = Total area - Area of unshaded region. Sometimes finding the area is simple, and other times, not so easy.

shaded region. 10 |  
bartleby menu

~~Answered: Find the  
area of the shaded  
region. 10 | bartleby~~  
And that area is going  
to be equivalent to the  
area of one circle with  
a radius of 3. So  
what's the area of a  
circle with radius 3?  
Well, the formula for  
area of a circle is  $\pi r^2$

# Access Free Area Of Shaded

squared, or  $r$  squared  
 $\pi$ . So the radius is 3.  
So it's going to be 3  
times 3, which is 9,  
times  $\pi$ --  $9\pi$ . So we  
have 100 minus  $9\pi$   
is the area of the  
shaded region.
