I.C-2017 SECTION ...

Part C: Specifications for Welding Rods, Electrodes, and Filler Metals. Part C contains material specifications for welding rods, electrodes and filler materials, brazing materials, and so on. These specifications are identified by the prefix SFA followed by a number such as SFA-5.1 or SFA-5.27. Part D: Properties. Part D covers material properties of all those materials that are permitted per Sections I, III, and VIII of the ASME Boiler and Pressure Vessel Code.

establish the allowable stress values. It has been reproduced below. It is worth noting that for bolting the factor of safety the ASME provides for the tensile strength and for tensile and yield strengths for bolting with strength enhancement by heat treatment is lower than wrought product at room temperature and above.
