Muscular Portfolios is here to change the investing game and help you leave stress behind with a stronger, smarter approach to investing. For decades, the financial services industry has sold risky investments, claiming that this was the only path to large gains. But this strategy is highly vulnerable to big losses that can devastate your portfolio. Today, there's a better approach. It combines the latest academic research in finance with the new ultra-low-cost index funds (exchange-traded funds). The result is an approach that provides market-like returns with dramatically smaller losses and requires only 15 minutes a month or less. Muscular Portfolios lays out the basic principles of this kind of investing so you can manage your own money successfully without turning it into your second job. Investigative journalist Brian Livingston takes you behind the curtain of Wall Street and lays out a game-changing approach to investing: Muscular Portfolios, which are easy-to-use financial strategies you can set up yourself, even if you have no investment experience at all. Filled with helpful illustrations, compelling evidence, and simple, no-nonsense instructions, Muscular Portfolios is a resource, not a sales pitch. There are no financial products to buy, no secret formula to pay for. Everything is fully disclosed in bite-sized steps and on a totally free website that you can start using today to grow your wealth. Driven by cutting-edge investment research and backed by extensive market testing, Muscular Portfolios will revolutionize investing for families and individual investors.

Longarm fires up Hell's Half Acre! After U.S. Deputy Marshal Custis Long blasts a killer to hell in an epic gunfight, he seeks respite in Hell's Half Acre. Notorious beyond its size, Fort Worth's Acre features bullet-riddled corpses and scores of barely dressed women, drunks, gamblers, tinhorns, outlaws, cowboys and tradesmen. What better place for a marshal to vacation? But, sooner than later, the bad guys in Hell's Half Acre need reminding that there's no rest for the wicked or for the lawman known as Longarm who blows them to blazes.

Engaging and informative, this book provides students and researchers with a pragmatic, new perspective on the process of collecting survey data. By proposing a post-positivist, interviewee-centred approach, it improves the quality and impact of survey data by emphasising the interaction between interviewer and interviewee. Extending the conventional methodology with contributions from linguistics, anthropology, cognitive studies and ethnomethodology, Gobo and Mauceri analyse the answering process in structured interviews built around questionnaires. The following key areas are explored in detail: An historical overview of survey research The process of preparing the survey and designing data collection The methods of detecting bias and improving data quality The strategies for combining quantitative and qualitative approaches The survey within global and local contexts Incorporating the work of experts in interpersonal and intercultural relations, this book offers readers an intriguing critical perspective on survey research. Giampietro Gobo, Ph.D., is Professor of Methodology of Social Research and Evaluation Methods at the Department of Social and Political Studies - University of Milan. He has published over fifty articles in the areas of qualitative and quantitative methods. His books include *Doing Ethnography* (Sage 2008) and *Qualitative Research Practice* (Sage 2004, co-edited with C. Seale, J.F. Gubrium and D. Silverman). He is currently engaged in projects in the area of workplace studies. Sergio Mauceri, Ph.D., is Lecturer in Methodology of Social Sciences and teaches *Quantitative and Qualitative Strategies of Social Research* at the Department of Communication and Social Research - University of Rome La Sapienza. He has published several books and articles on data quality in survey research, mixed strategies, ethnic prejudice, multicultural cohabitation, delay in the transition to adulthood, worker well-being in call centres and homophobia.

BASIC APPROACH: Comprehensive -- this text explores the "full range" of finite element methods used in engineering practice for actual applications in computer-aided design. It provides not only an introduction to finite element methods and the commonality in the various techniques, but explores state-of-the-art methods as well -- with a focus on what are deemed to become "classical techniques" -- procedures that will be "standard and authoritative" for finite element analysis for years to come. **FEATURES:** presents in sufficient depth and breadth elementary concepts AND advanced techniques in statics, dynamics, solids, fluids, linear and nonlinear analysis. emphasizes both the physical and mathematical characteristics of procedures. presents some important mathematical conditions on finite element procedures. contains an abundance of worked-out examples and various complete program listings. includes many exercises/projects that often require the use of a computer program.
