Atlas Copco's VSD⁺ technology closely follows the air demand by automatically adjusting the motor speed to match the compressed air supply to the demand. Combined with the innovative patented iPM (interior Permanent Magnet) motor (IE4), the GA VSD⁺ achieves average energy savings of 50%. This reduces the total lifecycle costs of the compressor up to 37% on average.

The world of air compressors can be a bit tricky to navigate, especially with the many acronyms, data points, and specifications that abound. That's where we come in. CFM, or cubic feet per minute, is the compressor's flow rate, or the amount of air that a compressor can produce at a given pressure level. This is the compressor's capacity ...
