in the “AutoInput Screen Capture” action. This allows you to accurately know if a screen matches one you captured before.

~~Changelog — Tasker and Join — joaoapps.com~~

Tasker’s action list is getting huge so it’s now more important than ever to be able to find the actions you’re looking for when you’re building your tasks. With that in mind, you can now find actions even if you don’t know their exact name!

~~Tasker 5.9.2 — ADB WiFi — Tasker and Join~~

After you join the betas, you’ll start getting regular updates from Google Play, but for the beta versions instead of just the regular ones. But don’t worry, once a regular version is released, you’ll get that too! Here are the current links for my betas. But remember: you have to join the community first or these won’t work!
