## **Autologous Fat Transplantation**

Fat grafting, also  
called autologous

# Where To Download

fat transfer, is  
emerging as a new  
breast

reconstruction  
technique. In fat  
grafting, fat tissue  
is removed from  
other parts of your  
body -- usually  
your thighs, belly,  
and buttocks -- by  
liposuction. The  
tissue is then  
processed into

# Where To Download

liquid and injected into the breast area to recreate the breast.

An autologous fat transfer is a cosmetic procedure that involves the transfer of fat cells from one part inside the body to

# Where To Download

another part. Autologous is a term used in relation to cells, blood, and tissues that means to have been harvested and transplanted into the same individual.
