Since its launch in the year 2012, the Belimo Energy Valve
has revolutionised the control of energy flow in buildings all over the world. With integrating the Belimo Energy Valve into the Belimo Cloud the user creates an own account to have full transparency about the energy consumption in the cooling/heating application - anytime from everywhere.

Actuators, Damper Actuators, Control Valves, Ball ... - Belimo The Belimo Energy Valve is an electronic pressure independent control valve with software-based services and cloud connectivity, measuring flow and temperature to monitor coil performance and energy consumption while maintaining the optimal Delta T. Automatic reports show actual and historical performance data, recommending the further potential for energy savings, predictive maintenance and troubleshooting.

The RACAV constant airflow regulator is dedicated for ventilations systems to keep the constant air flow. The device operates without power supply, from minimum differential pressure range referred to in diagram 1 to maximum differential pressure range equal to 1000Pa. Beyond that range the accuracy of the maintained air flow may deteriorate.
