Affective Domain - Bloom's Taxonomy

The Taxonomy of Educational Objectives, known as Bloom's Taxonomy (Bloom, Engelhart, Furst, & Krathwohl, 1956) is one of the most recognized learning theories in the field of education. Educators often use Bloom's Taxonomy to create learning outcomes that target not only subject matter but also the depth of learning they want students to achieve, and to then create assessments that accurately report on students' progress towards these outcomes (Anderson & Krathwohl, 2001).

Bloom's Taxonomy - University of Waterloo | University of ...

Bloom's Taxonomy: The Affective Domain. The affective domain is one of three domains in Bloom's Taxonomy, with the other two being the cognitive and psychomotor (Bloom, et al., 1956). For an overview of the three domains, see the introduction. The affective domain (Krathwohl, Bloom, Masia, 1973) includes the manner in which we deal with things emotionally, such as feelings, values, appreciation, enthusiasms, motivations, and attitudes.

Blooms Taxonomy Affective Domain University

Bloom's taxonomy is nothing short of a simple yet powerful explanation of the nature of thinking itself. Forehand writes: "Bloom's Taxonomy is a multi-tiered model of classifying thinking according to six cognitive levels of complexity" 1. It is one of the most widely used and often cited works of education 1. Bloom's taxonomy can serve many purposes: it

Bloom's Taxonomy: The cognitive domain - Teaching and ...

Krathwohl and Bloom proposed the affective domain in 1964 (8 years after the cognitive domain). Like the cognitive domain, it too divides its objectives into hierarchical subdivisions. This domain addresses the issues of the emotional component of learning and ranges from a basic willingness to receive information to the integration of beliefs, ideas, and attitudes.

The Definitive Guide To Bloom's Taxonomy. FREE PDF.

This compilation divides the three domains into subdivisions, starting from the simplest behaviour to the most complex. Cognitive > Affective > Psychomotor. Bloom's taxonomy is easily understood and is probably the most widely applied classification in use today.
