Bohn - Heritage Parts  
than the suction connection on the evaporator, a suction line trap at the outlet of the evaporator must be provided. Horizontal suction lines should slope away from the evaporator toward the compressor at the rate of 1/4 " per 10 feet for good oil return. Suction lines that are outside of refrigerated space must be insulated.

Installation and Operation Manual - Refrigeration Mechanics  
The standard design for the Bohn Low Profile Evaporator incorporates a hot gas loop in the drain pan. Utilizing a hot gas loop is ideal for hot gas defrost applications where high temperature gas can be maintained to defrost both the evaporator drain pan and coil.
