~~traditional procurement no longer fits!~~

~~Gerard Chick~~ Building Procurement

Construction management is a

procurement route in which the works are

# Get Free Building Procurement

constructed by a number of different trade contractors. These trade contractors are contracted to the client but managed by a construction manager. The construction manager acts as an agent for the client, administering and co-ordinating the works contracts.

Procurement route - Designing Buildings  
Wiki

The traditional procurement route involves separating design from construction. The client first appoints consultants to design the project in detail and to ensure cost control and inspect the construction works as they proceed. Contractors are then

# Get Free Building Procurement

Procurement practice is by necessity very diverse and depends on both the type of client – private or public – and the complexity of a project. For example, the government's –build, build, build– programme relies on investment to deliver the levelling-up agenda and enables the public-sector infrastructure clients to
