Morgan, Business Rules and Information Systems: Aligning...

Business rules are abstractions of the policies and practices of a business organization. In computer software development, the business rules approach is a development methodology where rules are in a form that is used by, but does not have to be embedded in, business process management systems. The business rules approach formalizes an enterprise's critical business rules in a language that managers and technologists understand. Business rules create an unambiguous statement of what a business

Business rules approach - Wikipedia

To be a business rule, a business person must be able to understand a statement or representation without significant training or experience in IT or IT-built systems. Now back to the rule: A log-in must be cancelled if the user enters the wrong password more than 5 times.This rule satisfies tests 1 and 3, but not 2.
