a) If $y = mx$ is shifted to the right by amount x_1 , the equation $y = m(x - x_1)$ results. If (a, b) satisfies this equation, then $b = m(a - x_1)$, and so $x_1 = a - (b/m)$. Thus the shifted equation is $y = m(x - a + (b/m)) = m(x - a) + b$. b) If $y = mx$ is shifted vertically by amount y_1 , the equation $y = mx + y_1$ results.

Calculus A Complete Course 8th Edition

Calculus: A Complete Course. Robert A. Adams, Christopher Essex. Proven in North America and abroad, this classic text has earned a reputation for excellent accuracy and mathematical rigour. Previous editions have been praised for providing complete and precise statements of theorems, using geometric reasoning in applied problems, and for offering a range of applications across the sciences.

Calculus: A Complete Course | Robert A. Adams, Christopher

...

It takes a bit more nuance to help students understand, and Calculus 8th Edition provides clear explanations, detailed diagrams, and additional resources to help students absorb the material. The text puts an emphasis on encouraging students to think critically and work through problems on their own. Beginning with a re-introduction of what most pre-calculus courses cover, the text moves to more advanced topics including derivatives, integrals, parametric equations, and vector functions.
