Cartan for Beginners: Differential Geometry via Moving ...

Regardless of how unfamiliar a geometry initially appears, the method of moving frames provides an algorithm to find differential invariants. Thus we will have a single method for dealing with conformal, Hermitian, projective and other geometries.

Cartan for Beginners: Differential Geometry via Moving ...

Cartan for Beginners: Differential Geometry via Moving Frames and Exterior Differential Systems, Second Edition. p. 17, Def. 1.6.4, line 2 change ω to ω p. 17, line -1 change $Ad\omega$ to $Ad(a\omega)$ p. 18, Def. 1.6.9 right-hand side of displayed equation should read $[\omega(X), \omega(Y)] = [\omega(Y), \omega(X)]$ (not $+$) p. 19, Proof of 1.6.10, last line the

“uniqueness” referred to is in the Frobenius Theorem p. 20, Exercise 1.6.14.3 change “complete the proof of” to “prove” p. 20 ...

Cartan for Beginners: Differential Geometry via Moving ...
Imbo Sim: National Institute of Mathematical Sciences, Daejeon, Korea. Two central aspects of Cartan's approach to differential geometry are the theory of exterior differential systems (EDS) and the method of moving frames. This book presents thorough and modern treatments of both subjects, including their applications to both classic and contemporary problems in geometry.

Cartan for Beginners: Differential Geometry Via Moving ...

In the mathematical field of differential geometry, a Cartan connection is a flexible generalization of the notion of an affine connection. It may also be regarded as a specialization of the general concept of a principal connection, in which the geometry of the principal bundle is tied to the geometry of the base manifold using a solder form. Cartan connections describe the geometry of
