The methyl group ( $\text{CH}_3$ ) is a substituent on the second carbon atom of the chain; the aldehyde carbon atom is always C1. The name is derived from pentane. Dropping the - e and adding the ending - al gives pentanal. The methyl group on the second carbon atom makes the name 2-methylpentanal.

Chapter 3 – Carbon Compounds. Chapter 3 Section 1. – Carbon Compounds. Section 1 Notes.  
ISOMERS Glucose, Fructose and Galactose are the THREE MONOSACCHARIDE SUGARS.  
Monosaccharide sugars are also called “simple sugars”. The monosaccharide sugars have a special property: Their CHO atoms always make molecules with numerical ratios of 1:2:1 Example:  $C_6H_{12}O_6$ ,  $C_{12}H_{24}O_{12}$  \* ISOMERS Even though the monosaccharides are different shapes, they still have the same number of CHO molecules.

Chapter 3 3.1 Organic Molecules. Organic chemistry is the chemistry of the living world. To be an organic molecule, the molecule must contain carbon and hydrogen. The Carbon Atom. Carbon has a total of six electrons, with four in its outer shell (remember that the other two would be in its inner shell)

## ~~Chapter 3~~

Rather, carbon atoms tend to share electrons with a variety of other elements, one of which is always hydrogen. Carbon and hydrogen groupings are called hydrocarbons. If you study the figures of organic compounds in the remainder of this chapter, you will see several with chains of hydrocarbons in one region of the compound.

Chapter 3. I wake up to the sound of gunfire and people screaming. My brain is fuzzy from sleep but I have been here before. I know the signs and noises and sounds and their meaning. My brain filters out the dream from the reality. I realize with clarity that the ship is under attack. My heart rate speeds up, I take deep breaths. Not a dream.

~~Chapter 3 — Page 4 — DAREBEE~~

A NOTED CARBON-14 RESULT DeYoung notes that this method can be used in support of biblical ideas. He gives the example of the Dead Sea Scrolls, the linen wrappings of which were dated to between 150 B.C. and 70 A.D. Thus, his noted carbon-14 result is that 14 C dating supports the Bible. THE PERVASIVENESS OF CARBON-14
