*Principles*

Let a n = 1 n, and it
is clear that it
diverges. Let a n =
1 whenever n is a
square and a n = 2
– n otherwise. This
series clearly
diverges, since the
terms do not tend
to 0 as n       .
Then     n = 1 N a n
1 + n a n       n =

$1 N 1 n 2 + \quad n =$ $1 N 1 2 n$ and the series therefore converges.
