Perception, Chapter 6 Pt 3 **Sensation versus Perception | Psychology Chapter 6 Sensation And Perception**

Chapter 6 Sensation and Perception
Sensation vs. Perception
Sensation: Process of detecting physical energy (stimulus) from the environment and converting it to neural signals
Perception: Process of selecting, organizing, and interpreting our sensations
Bottom-Up Processing: Analysis that begins with the sensory receptors and works up to the brain's integration of sensory information
Top-Down Processing: Information process guided by higher level mental processes, as when we ...

sensory systems ignore it; 6.2 Touch and Pain

Outline

Chapter 6: Sensation and Perception sensation The detection of physical energy emitted or reflected by physical objects; it occurs when energy in the external environment or the body stimulates receptors in the sense organs (eyes, ears, tongue, nose, skin and internal body tissues) Perception is the process by which sensory impulses are organized and interpreted.

6_Sensation and Perception.docx - Chapter 6 Sensation and ...

Sensation and perception are two separate processes that are very closely related. Sensation is input about the physical world obtained by our sensory receptors, and perception is the process by which the brain selects, organizes, and interprets these sensations. In other words, senses are the physiological basis of perception.

Chapter 6 - Sensation and Perception Deck - StudyBlue

Our definition, however, marks off perception from sensation in its emphasis upon the consciousness of objects, or things. Sensation, as we saw in the last chapter, is more appropriately conceived as concerned with the consciousness of qualities. The two processes have this in common, that both are produced by the stimulation of a sense organ.
