The goal of all chess puzzles is to checkmate your virtual opponent no matter what moves they make (i.e. a forced mate), in the requested number of moves. Some chess puzzles are created from actual chess games played online, and some are purely composed chess problems, sometimes even with positions that cannot be reached in a real game of chess. All chess puzzles are automatically verified, so all solutions are guaranteed to be correct and complete.

THE CHESS PUZZLE. What you think jerry ? The above picture puzzle shows that the Tom and Jerry is thinking to find the solution of the puzzle. ANSWER: Answer is 16. After solving we get that, King + Pawn = 18. King + 2 = 18. King = 18 - 2.

#### THE CHESS PUZZLE - WITH ANSWER - Forward Junction Puzzles

Answer to Advanced Chess Puzzle #1. The correct move is h6. This buys a move and because the bishop cannot cover both e5 and d8 and is now forced to move, white wins. If black plays B-d6, then white plays N-d8 and follows with mate on f7. If black moves the bishop and continues covering d8, then white plays the knight to e5 and again mates with N-f7.

The original section (the hard puzzle section) has found many chess players flustered as even the best players have a hard time solving them. I decided that I would make an easy section for those players that are either new to chess and still like puzzles or for those players that have given up on all the hard puzzles.
