is an emerging model system for elucidating gene networks in development.

Regulatory blueprint for a chordate embryo.

In anatomy, the notochord is a flexible rod formed of a

Online Library Chordate Embryology

material similar to cartilage. If a species has a notochord at any stage of its life cycle, it is, by definition, a chordate. The notochord lies along the anteroposterior ("front to back") axis, is usually

Online Library Chordate Embryology

closer to the dorsal than the ventral surface of the animal, and is composed of cells derived from the mesoderm.
