I got these commands from Cisco documents to deploy AnyConnect silently to a bunch of PC as part of migration project. This is make sure that

there is really no user interaction when this AnyConnect push is happening.
Commands: msiexec /package anyconnect-win-4.7.04056-core-vpn-predeploy-k9.msi /norestart /passive /lvx* log24.log

Solved: AnyConnect deployment via SCCM - Cisco

Community

We need to deploy 4 msi files as well as a profile folder. We are using the SCCM to insure the users do not uninstall AnyConnect. We want to deploy using the domain admin credentials, as some users are not admins and can not install the software. During our

initial test with the SCCM we got a message that a module was missing.
