Estimating and Costing are closely the same things. The estimate is defined as the process of calculating or computing the various quantities and the expected expenditure to be incurred on a particular work or project. The estimate gives the probable cost of the work. The primary objective of an estimate is to enable one to know the probable cost of the work before the completion of the project.

Estimating and Costing | Estimating and costing in civil ...

Different types of estimates in civil engineering July 18, 2020 In this web we Explain What is estimate, estimating and, costing? data required for preparing estimate, different types of estimates, approximate estimate, detailed estimates, purpose of estimates, skills required for estimator and duties of estimator and so more.

Estimating Costing And Valuation | Civil Engineering Web

Introduction to Estimating and Costing Before any engineering project is to be constructed, it is necessary to know its estimated cost to ascertain whether the required funds can be made available for its completion or not. If the funds available are more than the estimated cost of the work, the execution of the work can be started.

Estimating and Costing |Data required for preparation of ...

Estimation is necessary as it clearly gives an idea about the cost and time required to complete a project. An estimate helps to decide whether the funds and time allocated for the project is enough or not. To call tenders and to arrange the contractors also an estimate is necessary.
