Cloud computing offers a cheaper, more flexible and more efficient way to manage corporate IT expenditure. This makes it a very attractive proposition to most CEOs. As businesses shun in-house IT equipment in favour of renting IT infrastructure, platforms and software from the Cloud, many traditional IT services companies face a serious threat.

What is Cloud computing in business and why does it matter?

Cloud Computing is the IT services delivery model of the near future. The problem is, there are very few experts that have hands-on understanding of its competitive and organizational impacts. The vast majority of books address the technical details of cloud, but few emphasize its implementation and deployment at the scale of the enterprise.
