The operative report is truly a goldmine of information. This is true in ICD-9, and it will be even more important in ICD-10, when coders will need to look for more specific anatomical information, as well as additional details about the procedure itself. They'll need to read each and every line looking for details related to the root operation, the surgical approach, the device, the body part/region, and more.

## Dissecting the Operative Report in ICD-10: Ten Tips to ...

Diagnosis code reporting—Use the post-operative diagnosis for coding unless there are further defined diagnoses or additional diagnoses found in the body of the operative report. If a pathology report is available, use the findings from the pathology report for the diagnosis.
