Concept Development. The process begins with ideation—small, quick sketches to investigate various design directions. Once these sketches have captured the essence of the product, they move to the digital world. Using state-of-the-art Alias 3D software, our designers begin to construct virtual products.

~~Casablanca Fans - Lighting New York~~

2.5 Develop Concepts Alex Hass. Step 3: Developing Concepts. Concept development is a process of developing ideas to solve specified design problems. The concepts are developed in phases, from formless idea to precise message in an appropriate form with supportive visuals and content.
