## analysis: REVIEW ...

Context models as interface between event models and discourse The first major function of context models is to mediate between event or situation models on the one hand, and (semantic structures) of discourse on the other hand. This is one of the many aspects of mental modeling of discourse that has hardly received any attention.

## Cognitive Context Models and Discourse

Abstract In this article the relevance of a sociocognitive approach to discourse is shown by presenting a new theory of context,

Contexts defined as participant definitions, that is, as mental constructs, are able to function as the interface between situational and societal structures and discourse structures, because they subjectively 'represent' relevant aspects of situations and society and directly interfere in the mental processes of discourse production and comprehension.

Biomedical models trump cultural and contextual understanding of mental health, distress, illness, and disease every time. DISTINCTIVE LOGIC AND MODELS Biomedical models of illness consider naturalistic explanations of disease, degeneration, and deficiency as causal.
