Visual art therapy. Visual art therapy (also known as art therapy) involves using visual art materials. For example, you might use pens, pencils, crayons, paint, chalk, clay or collaging. You don't need to have any art skills or experience. With support from your therapist, you might use art materials to express your feelings or experiences.

Types of arts and creative therapies | Mind, the mental ...
As with all treatments, different things work for different people at different times and it's not easy to predict which type of therapy you might find useful or effective. Although some people find arts and creative therapies helpful, not everyone does. If you've tried something and it hasn't helped, try not to blame yourself.

The expressive therapies are the use of the creative arts as a form of therapy, including the distinct disciplines expressive arts therapy and the creative arts therapies (art therapy, dance/movement therapy, drama therapy, music therapy, poetry therapy, and psychodrama). Unlike traditional arts expression, the process of creation is emphasized rather than the final product.

Expressive therapies - Wikipedia
Hi and welcome to the Creativity in Therapy blog! I ' m Carolyn Mehlomakulu – an art therapist and psychotherapist. I started this blog so that I could share creative resources with other mental health professionals, both art therapists and therapists that want to bring art and creativity in to their work.
