pm An interesting and wonderful course..It
was really easy and I enjoyed my time..I did
very well during the semester except the final
which was really easy but I didn't do well on
it..But at the end I was really satisfied with
my results..

computer linked through transmission media. Through the network, we can transmit the data signal from one point to another. 5. A large community support provides by computer network and extensive documentation libraries.

~~Difference Between Computer Network and Data Communication...~~

Switching techniques are used for transmitting data across networks. Different types are :

1. Circuit Switching: In the Circuit Switching technique, first, the complete end-to-end transmission path between the source and the destination computers is established and then the message is transmitted through the path. The main advantage of this technique is guaranteed delivery of the message.

Data communications (DC) is the process of using computing and communication technologies to transfer data from one place to another, or between participating parties. DC enables the movement of electronic or digital data between two or more network nodes, regardless of geographical location, technological medium or data contents.
