DATA SHEET Reciprocating Holder Apparatus 7 Agilent Reciprocating Holder Apparatus 7 is designed for modi? ed, extended and sustained drug-release performance testing. The system uses a reciprocating motion to dip the dosage form into fresh media at programmed time intervals. Con? gurable. Select standard 50 mL

DATA SHEET Reciprocating Holder Apparatus 7  
The standard apparatus has seven reciprocating positions for each of the six rows with 100 or 300 mL outer tubes. The holder has a stroke length of 20 mm and agitates at 5 to 40 dips per minute. Following a designated time period, the dosage form is transported from one row to the next, and can be programmed to move to a fresh row of media, up to six media changes.

Apparatus 7 (Reciprocating Holder)  
The TABER® Reciprocating Abraser (Abrader) – Model 5900 is a test apparatus similar to the instrument described in test method ISO 1518. Ideal for flat surfaces, this tester can be configured with optional attachments to evaluate the relative resistance or susceptibility of a material surface to physical damage such as wear and abrasion, rub, scratch, mar, gouge, scrape, plus others.

Taber Reciprocating Abraser - HJ Unkel  
The apparatus is suitable if the results?Procedure for a Pooled Sample for Immediate- obtained are within the acceptable range stated in the tech-Release Dosage Forms—Use this procedure where Proce- nical data sheet specific to the lot used and the apparatusdure for a Pooled Sampleis specified in the individual mono- tested. graph.

Apparatus 1 (Basket Apparatus)  
The assembly consists of a set of cylindrical, flat-bottomed glass vessels; a set of glass reciprocating cylinders; inert fittings (stainless steel type 316 or other suitable material), and screens that are made of suitable nonsorbing and nonreactive material and that are designed to fit the tops and bottoms of the reciprocating cylinders; and a motor and drive assembly to reciprocate the cylinders vertically inside the vessels and, if desired, index the reciprocating cylinders horizontally ...

DrugFuture  
The Taber® Reciprocating Abraser (Model 5900) can perform similar tests as the Taber Linear Abraser, but the notable difference is a sliding specimen platform moves in a horizontal, reciprocating motion under a stationary tool holder. Other features include a counterbalanced arm which pivots on an adjustable height gantry system. The counterweight allows the user to balance the test arm, ensuring precise test load set-up without worrying about the weight of the test attachment.

18V Cordless Reciprocating Saws - Makita UK  
DATA SHEET No. EASA.IM.A.090 for Piper PA-34 Type Certificate Holder: Piper Aircraft, Inc. ... Type Certificate Holder Record III. Change Record . TCDS IM.A.090 Piper PA-34 Page 4 of 15 ... Description: Twin engine reciprocating turbocharged, all-metal, six-place, unpressurized, low wing airplane, retractable tricycle landing gear.

TYPE-CERTIFICATE DATA SHEET - EASA  
An apparatus that permits obser- and inert material, is mounted vertically with a filter system vation of the specimens and reciprocating cylinders is pref-(specified in the individual monograph) that prevents escape erable.

711 DISSOLUTION - USP  
The TABER Reciprocating Abraser - Model 5900 is a test apparatus similar to the instrument described in test method ISO 1518. Ideal for flat surfaces, this tester can be configured with optional attachments to evaluate the relative resistance or susceptibility of a material surface to physical damage. Utilizing scratch styli (sold separately), the Taber Reciprocating Abraser allows you to ...

Reciprocating Abraser - Model 5900 — Neurtek  
Ideal for flat surfaces, the Taber Reciprocating Abraser can be configured to evaluate the susceptibility of a material surface to abrasion, scratch, scrape, rub, plus many other physical properties. With optional accessories based on GM test methods, this apparatus will also test the abrasion resistance of textile specimens using various friction media.
