Student Answer To The Dichotomous Key Gizmo
Answers. A dichotomous key is a tool that taxonomists often use to classify organisms correctly. It is a form of hierarchical grouping that involves making decisions in a series of steps, from general differences to very specific differences. It is called a di chotomous key because there are always two choices.

Dichotomous Key | Classification
Using a Dichotomous Key Take a few minutes to sort through and group the insect cards by physical characteristics. A dichotomous keyis a tool that allows the user to determine the identity of an item based on physical traits. Keys have a series of two choices in each step that lead the user to the correct name of a given object.
