In Does Capitalism Have a Future?, the prominent theorist Georgi Derleugian has gathered together a quintet of eminent macrosociologists to assess whether the capitalist system can survive. The prevalent common wisdom, for all its current gloom, nevertheless safely assumes that capitalism cannot break down permanently because there is no alternative.

Does Capitalism Have a Future?: Amazon.co.uk: Wallerstein ...
Capitalism requires a free market economy to succeed. It distributes goods and services according to the laws of supply and demand. The law of demand says that when demand increases for a particular product, price rises. When competitors realize they can make a higher profit, they increase production.

Besides capitalism, these include politics, military geopolitics, ideology, and multiplicity of world regions. Such complexity, in Mann's view, renders the future of capitalism unpredictable. The overriding threat, which is entirely predictable, is the ecological crisis that will grow throughout the twenty-first century.

Does Capitalism Have a Future? | Motanomics
Does capitalism have a future? Of course, it does. But it is not necessarily pretty. Wealth can be generated in evermore extensive and intensive ways even in a world full of crises and challenges. And because capitalism is the dominant economic system in the world, it could continue to contribute to climate change, conflict, inequality and instability.

may be even more likely. Markets can exist in the future even while specifically capitalist modes of property and finance have declined. Capitalism may survive but lose some of its ability to drive global economic integration. Michael Mann favors a social democratic solution for the problems of capitalism, but he also

Does Capitalism Have a Future?: Wallerstein, Immanuel ...
Capitalism has never been a planned system, but rather an emergent one. As such, it is governed not by consistent practices, but by evolving practices subject to consistent rules. The essential rule of capitalism is not that markets should be free from regulation or augmentation, but that individuals should be free to compete in fair markets.
