Econometrics - Exam 1. Exam. Please discuss each problem on a separate sheet of paper, not just on a separate page! Problem 1: (20 points) A sample of data consists of n observations on two variables, Y and X. The true model is $Y_i = \beta_1 + \beta_2 X_i + \varepsilon_i$, (1.1) where β_1 and β_2 are parameters and ε is a disturbance term that satisfies the usual regression model assumptions.

First Midterm (practice with solution)
Introduction. While studying principles of econometrics, it is essential that you not only understand the basic concepts but also practice a sufficient number of questions to understand the applications and help while taking econometrics tests. While previous econometrics test papers may be available along with econometrics exam solutions, a systematic approach to studying along with practice questions on each topic is quite helpful.
