Reflection is the change in direction of a wavefront at an interface between two different media so that the wavefront returns into the medium from which it originated. Common examples include the reflection of light, sound and water waves.The law of reflection says that for specular reflection the angle at which the wave is incident on the surface equals the angle at which it is reflected.

Reflection papers allow you to communicate with your instructor about how a specific article, lesson, lecture, or experience shapes your understanding of class-related material. Reflection papers are personal and subjective, but they must still maintain a somewhat academic tone and must still be thoroughly and cohesively organized.
