A critical attitude towards one's own practice and to the evidence is, in my opinion, one of the greatest achievements of the evidence?based movement. Critical thinking can, and perhaps should, be integrated with reflexive practice (Bannigan and Moores, 2009). There are many tools to support critical thinking, appraisal and action.

Evidence?based Practice: A Critical Appraisal - Ilott ...

Evidence-Based Practice: A Critical Appraisal stands back from the flurry of excitement and activity that has accompanied the development of evidence-based practice. This is the first text to provide a critical appraisal of the strengths and weaknesses of evidence-based practice, weighing the arguments of both advocates and opponents of the approach.

Evidence Based Practice: A Critical Appraisal: Amazon.co ...

Evidence-based practice is an idea whose time has come. Few concepts can have achieved the status of unchallengeable common sense in such a short space of time, and across such a broad range of professional activity. As yet there have been few opportunities to take stock and reflect on the evidence for evidence-based practice, or the implications of its adoption.

Evidence-Based Practice: A Critical Appraisal - Google Books

Introduction. Evidence-based practice is about making better decisions, informing action that has the desired impact. An evidence-based approach to decision-making is based on a combination of using critical thinking and the best available evidence. It makes decision makers less reliant on anecdotes, received wisdom and personal experience - sources that are not trustworthy on their own.

Evidence-based Practice for Effective Decision-Making ...

Abstract. Critical thinking (CT) is vital to evidence-based nursing practice. Evidence-based practice (EBP) supports nursing care and can contribute positively to patient outcomes across a variety of settings and geographic locations. ... Among the knowledge, skills, and also processes needed to support EBP, CT is paramount.

Evidence-based practice: critical interpretation of data ...

CRITICAL THINKING (CT) is vital in developing evidence-based nursing practice. Evidence-based practice (EBP) supports nursing care that can be "individualized to patients and their families, is more effective, streamlined, and dynamic, and maximizes effects of clinical judgment" (Youngblut & Brooten, 2001, p. 468). Evidence-based practice can contribute positively to patient outcomes across a variety of settings and geographic locations.

Best practice in occupational therapy occurs when therapists, working in partnership with client (s), use research evidence along with clinical knowledge and reasoning to implement interventions that are effective. The McMaster Occupational Therapy Evidence-based Practice group focuses on research to critically review evidence regarding the effectiveness of occupational therapy interventions and to develop tools for evaluation of occupational therapy programmes.
