1502 Words7 Pages. Laboratory #1 Introduction to Laboratory Techniques

Sean Pence Jackie Butler September 6, 2012 September 13, 2012

Abstract: This lab contains four different experiments. All four experiments focus on proper laboratory techniques. The reasoning behind this lab was to become familiar with lab equipment, the proper usage of lab equipment, and how to correctly take data and notes.

Lab 1 Practice using the analytical balance and clean your glassware. A brief soaking in warm detergent solution should be enough to remove grease and dirt. If not, consult your TA. Become familiar with your glassware and begin calibrating it. Lab 2 Calibrate your glassware. During this lab period you will need to check out one or more

This experiment was designed to introduce you to two of the most common modes of data collection that will be used in this class. Part I will guide you through collecting and analyzing data over time. A Temperature Probe will be used to record the temperature of water for 60 seconds at a rate of one sample per second.
