But their favorite topic, the one to which they have turned with unflinching habit for centuries, approaching it with an alchemical reverence that borders on mysticism, is that of wood finishing. Fine finishes – lustrous, highlighting the wood 's grain, inviting the hand to touch – have long been the pinnacle of wood craftsmanship.

fine boat finishes for wood and fiberglass - Free Textbook PDF

Varnish and various wood oils have been the traditional transparent wood finishes on boats for hundreds of years. Their lack of pigment allows the beauty of the wood grain to show through, while protecting the wood from the ravages of sunlight, saltwater, dirt and abrasion. The finish achieved after careful application can vary from practically invisible protection for interior and exterior wood, to a glossy fine-furniture coat.

Wood Finishes for Boats | West Marine

Often the hardest part of refinishing wood on a boat is getting the old finish off. Unfortunately, there is no magic solution. It usually takes a combination of methods, all involving a large tub of elbow grease and a bucket of patience. The most basic removal methods, which I will not discuss here, are straight sanding and scraping.

Fine Boat Finishes: For Wood and Fiberglass Boats by Marya ...

A number of "marine" wood finishes, whether resin- or polymer-based, try to improve their durability by including stain or pigment. This ploy is effective, as translucent finishes outlast transparent ones, all other things being equal. The more opaque a finish, the longer it lasts, but the poorer job it does of bringing out the natural beauty of the wood. Whether to use a pigmented finish is, of course, a matter of taste.
