The Fire Service Manuals Volumes 1-4 have been devised by the Office of the Chief Fire and Rescue Adviser (CFRA); established in 2007, CFRA replaced what was formerly HM Fire Service Inspectorate and continues to provide advice and guidance on the structure, organisation and performance of the Fire and Rescue Service.

Fire Service Manuals - Volume 4: Fire Service Training ...

This manual recognizes that there are two types of involvement with these buildings by the fire service. The first is fire prevention and its involvement with plan checking and ongoing inspection. The second is fire department response and suppression and its ability to perform during an emergency.

FSM Volume 3 Fire safety - Basic principles of building ...

For fire service purposes it is much more convenient to compare the density of gases and vapours with that of air. The reference gas should always be given to avoid confusion: for example, the vapour density of methane is 0.556 (air = 1), or 8 (hydrogen = 1). 1.2 Liquids of different density As we have said, the density of a burning liquid partly decides whether it is possible to cover it with ...

V. 1. FIRE SERVICE TECHNOLOGY, EQUIPMENT & MEDIA - PHYSICS

Manual, Volume 2, Fire Service Operations – Incident Command, 3rd Edition 2008. Ventilation of the premises should be conducted in a controlled and considered manner with due account taken of wind conditions. Effective communications are essential for this to be achieved. Ventilation points and exposed risks should be covered by water sprays to reduce the risk of external fire spread ...

Fire and Rescue Service Operational Guidance

A methodology to record the findings of risk assessments is provided in A Guide to Operational Risk Assessment - Volume 3 of the Fire Service Health and Safety Guidance for generic risk assessments. As stated in (a) above, the first risk control measure is to avoid the risk altogether.
