In keeping with its bestselling previous editions, Fundamentals of Aerodynamics, Fifth Edition by John Anderson, offers the most readable, interesting, and up-to-date overview of aerodynamics to be found in any text. The classic organization of the text has been preserved, as is its successful pedagogical features: chapter roadmaps, preview boxes, design boxes and summary section.

The range of the aircraft is proportional to LID (see for example, Anderson, Aircraft Performance and Desim, McGraw-Hill, 1999, or Anderson, Introduction to Flight, 4th ed., 17 McGraw-Hill,2000). To obtain maximum range, the airplane should fly at the velocity for maximum LID, which for this case is 140 ftJsec.
