A closed system is defined as a thermodynamic system in which only energy transfer takes place and there is no transfer of mass across its boundary. It always contains the same mass. Hence, the correct option for the closed system is. Step 3 of 10

Fundamentals of Engineering Thermodynamics, 9th Edition ...

What you'll learn. Identify the basic principles of thermodynamics. Analyze some steady-flow engineering devices such as nozzles, compressors, turbines, throttling valves, mixers, and heat exchangers. Evaluate work, heat transfer and power in processes. Understand entropy concept and the 2nd law of thermodynamics, and apply them to practical problems.
